

Windows Virtual Desktop

Flexible Work Experiences for a Modern Workforce

It's becoming more important that employees be able to access their data and desktop from anywhere. Windows Virtual Desktop enables your employees to securely connect to their workspace from almost any device, allowing them to work and be productive regardless of location.

As a Microsoft product, Windows Virtual Desktop is a known quantity for your company and your employees. It offers a familiar end-user experience and built-in security controls, while also being designed to help you save money. And when you let IMS Solutions Group manage your Virtual Desktop, you get best-in-class support and assistance.

KEY BENEFITS

ENHANCED SECURITY

Because it's built in Azure, Windows Virtual Desktop comes standard with state-of-the-art security. Security features include secure sign-on, multi-factor authentication and roll-based access, allowing you to control access to sensitive company and customer information while giving your employees access to the information they need.

CONSISTENT AND FAMILIAR END-USER EXPERIENCE

Windows Virtual Desktop is designed to work with Office. This means your employees will be provided with a familiar desktop experience, complete with uncompromised access to the programs, applications and tools they already know.

SUPERIOR ECONOMICS

Windows Virtual Desktop reduces your compute costs without sacrificing user experience. It is the only way to access Windows 10 multi-session and is the most cost-effective way to give employees the full Windows 10 experience they're used to. Plus, IMS Solutions Group's simplified pricing model eliminates the complexities of hyperscale cloud billing and management.

SUPPORT FROM IMS SOLUTIONS GROUP

As a Microsoft Gold partner, IMS Solutions Group can design, implement and support your Virtual Desktop solution from end to end. This means setting up new employees, assisting employees with any issues, providing security and maintenance support and much more.

USE CASES

Remote work - Whether your employee is a permanent remote worker or is unexpectedly working from home, Windows Virtual Desktop enables them to remain productive with all of their tools and programs at their fingertips.

Working in an office without an assigned desk - Employees need to be able to work effectively no matter where they sit. With Virtual Desktop, employees can simply choose a seat and log into their workspace.

Last minute needs - Sometimes an employee just needs to send a file when they're not near their computer. Virtual Desktop allows them to access all of their files and send the exact one you need even if they're halfway around the world.
